Explanation of State Expenditures:

Explanation of State Revenues:

Explanation of Local Expenditures: This bill may potentially increase local expenditures to the extent (1) a juvenile court elects to create a voluntary preventative program for at-risk children, and (2) the court elects

to assign an early intervention advocate to youth involved in at-risk programming. The costs of creating voluntary preventative programs for at-risk children and assigning early intervention to at-risk children are unknown and will depend on the decision of the local juvenile court. Depending on how these early intervention advocates are selected by the juvenile courts (volunteers, paid staff, or by contract), local expenditures and/or workload may increase. Actual increases in expenditures and/or workload are indeterminable.
